## ***Business Development in the Group***

AIXTRON confirms the preliminary figures released on April 14, 2026. Order intake of EUR 171.4 million in the first quarter of 2026 signals a clear improvement in market momentum, driven by very strong demand for optoelectronics systems. This development is underscored by multi-tool orders from several customers. Major system shipments are expected to begin in Q2/2026 and continue beyond the current fiscal year.

In the power electronics market, demand for SiC-tools remained soft, while demand for GaN-tools stayed stable at a low level. In the first three months of 2026 **revenues** of EUR 59.4 million were in line with the guidance of EUR 65 million in a range of  $\pm$  EUR 10 million, and seasonal expectations (Q1/2025: EUR 112.5 million).

Optoelectronics accounted for almost 70% (EUR 118.0 million) of order intake in Q1/2026 and is currently AIXTRON's main demand driver. **Order intake** in the first three months of 2026 amounted to EUR 171.4 million, surpassing the previous year's level by 30% (Q1/2025: EUR 132.2 million).

The company continues to see high multi-tool order activity, contributing to a robust pipeline beyond 2026. As of March 31, 2026, **equipment order backlog** stood at EUR 359.1 million, up from EUR 307.9 million in Q1/2025 and up from EUR 257.8 million at the end of 2025.

In April 2026, AIXTRON successfully placed a convertible bond with a total nominal value of EUR 450 million and a maturity date of April 2031, thereby strengthening the company's financial flexibility. Since the issuance did not take place until April, the measure had no impact on the Group's net assets, financial position, and results of operations in the first quarter of 2026.

In the first quarter of 2026, AIXTRON also announced plans for a new production facility in Malaysia. This move is intended to strengthen the company's long-term manufacturing flexibility and resilience, particularly to better support customers in Asia.

## Development of Results

Revenues in the first three months of 2026 amounted to EUR 59.4 million. This is in line with seasonal expectations (Q1/2025: EUR 112.5 million) and within the guidance of EUR 65 million in a range of  $\pm$  EUR 10 million (Q1/2025: EUR 112.5 million).

In the first three months of 2026, over 52% of equipment revenue came from the optoelectronics equipment business, particularly for the manufacture of lasers for optical data communication and 3D sensing technology. The LED segment, including Micro LED, accounted for 31% of equipment revenue during the same period. 17% of equipment revenue in the first three months of 2026 was generated by equipment for power electronics based on gallium nitride (GaN) and silicon carbide (SiC).

AIXTRON applied an average **USD/EUR exchange rate** of 1.18 USD/EUR in the first three months of 2026, compared to 1.04 USD/EUR in Q1/2025. Compared to the previous year's average, the US dollar thus depreciated by -14% in Q1/2026, with a corresponding effect on the US dollar-based revenues of the AIXTRON Group in the course of the first three months of 2026.

<b>EBIT</b>	<b>-22.3</b>	<b>-38%</b>	<b>3.3</b>	<b>3</b>	<b>-25.6</b>	<b>n.m.</b>

**Gross profit** in Q1/2026 was EUR 10.8 million (Q1/2025: EUR 34.1 million), down from the prior-year level. The **gross margin** was 18% (Q1/2025: 30%). Gross profit includes one-time expenses in the mid-single-digit million-euro range related to the workforce reduction in the operating division carried out in the first quarter of 2026. The additional decline in the gross margin compared to the prior year is primarily attributable to lower production volume.

**Operating result (EBIT)** for the first three months of 2026 was EUR -22.3 million, corresponding to an EBIT margin of -38% (Q1/2025: EUR 3.3 million or 3%). In addition to the factors affecting the gross margin, **operating expenses** increased slightly to EUR 33.0 million (Q1/2025: EUR 30.8 million), primarily due to higher research and development expenses, which increased by 40% year-over-year to EUR 24.8 million (Q1/2025: EUR 17.7 million). Other operating income was driven in particular by higher grants for research and development.

**Net result** for the first three months of 2026 was EUR -21.9 million (Q1/2025: EUR 5.1 million).

## ***Cash flow and Financial Position***

**Cash flow from operating activities** amounted to EUR 53.6 million in the first three months of 2026, compared to EUR 35.1 million in Q1/2025 (Q4/2025: EUR 79.9 million). In particular, the reduction in working capital had a positive impact compared to the prior year. Operating cash flow was impacted by the expected lower revenue.

**Free cash flow** (cash flow from operating activities – investments in property, plant, and equipment, intangible assets, and long-term financial assets + proceeds from disposals) amounted to EUR 48.5 million in the first three months of 2026 (Q1/2025: EUR 29.8 million; Q4/2025: EUR 71.7 million).

As of March 31, 2026, AIXTRON reported **cash and cash equivalents, including other current financial assets**, of EUR 272.7 million (December 31, 2025: EUR 224.6 million).

AIXTRON had no bank liabilities as of March 31, 2026 and December 31, 2025. The unused revolving credit facility amounted to EUR 200.0 million as of March 31, 2026.

The Executive Board and Supervisory Board will propose to the upcoming Annual General Meeting on May 13, 2026, that a **dividend** of EUR 0.15 per eligible share (2024: EUR 0.15 per share) be distributed from the retained earnings of AIXTRON SE for the fiscal year 2025.

After the balance sheet date in April, AIXTRON successfully placed an unsecured and unsubordinated **convertible bond** with a total nominal amount of EUR 450 million and a maturity date of April 2031. The bonds do not bear periodic interest. The net proceeds from the issuance are to be used for general corporate purposes, which may include investments to support organic growth as well as acquisitions and share buybacks. The issuance strengthens the company's long-term financing security and financial flexibility. Since the convertible bond was issued after the balance sheet date of March 31, 2026, there is no impact on the Group's net assets, financial position, and results of operations in the first quarter of 2026.

## **Outlook**

AIXTRON confirms its updated full-year guidance for the **fiscal year 2026** published on April 14, 2026. The outlook is supported by a healthy optoelectronics pipeline and the expected start of major system shipments from Q2/2026 onwards. The Executive Board expects **revenues of EUR 560 million** in a range of  $\pm$  **EUR 30 million** (previous: EUR 520 million in a range of  $\pm$  EUR 30 million), a **gross margin** of around **42%** (previous: 41% to 42%) and an **EBIT margin** of **17% to 20%** (previous: 16% to 19%) **for the fiscal year 2026**.

The guidance for the gross margin and EBIT margin includes one-off expenses in a mid-single digit million amount related to the personnel reduction undertaken in the operations area carried out in the first quarter of 2026. The measure will lead to annualized savings at a comparable level in the future.

For the **second quarter of 2026**, the Executive Board expects **revenues of EUR 110 million** in a range of  $\pm$  **EUR 10 million**.

The Executive Board is closely monitoring geopolitical tensions. Potential impacts on energy prices, supply chains, financial markets, as well as investment and demand behavior are continuously analyzed. If necessary, AIXTRON will respond appropriately to risks that could negatively affect the business performance.

Further details on the annual guidance can be found in the “Expected Developments” section of the Annual Report 2025. The annual report is available on the Company’s website at [www.aixtron.com/en/investors/publications](http://www.aixtron.com/en/investors/publications).
